Cabin Electronic Systems puts you in Total Control with Custom Switches

Our CMS switches have become the envy of the industry through our innovative approach to cabin control. We provide a fully customizable interface for entertainment and cabin management for virtually any aircraft.

Total Cabin Capability

The Interiors business of UTC Aerospace Systems is a global provider of aircraft cabin systems, including cabin management systems, wood veneers, cabinetry, furniture, in-flight entertainment (IFE) systems, cargo systems, evacuation systems and life rafts, interior and exterior lighting systems, propulsion systems, and specialty seating systems, including Advanced Concept Ejection Seats (ACES), pilot/co-pilot, observer, cabin attendant and VIP seats. We take pride in offering “Total Cabin Capability”.

Innovators in Cabin Management and In-flight Entertainment System

Known as the industry innovator since 1986, our specialty is “cutting-edge” entertainment and cabin management systems, customized to meet customer’s desires. Full digital systems, including the innovative Platinum Hi-Def Entertainment System with full 1080p resolution, provide theater-quality entertainment aboard the aircraft. Cabin Management Systems (CMS) with customized command and control capabilities via integrated touch-screens or full color LCD switches make Cabin Electronic Systems the premier vehicle for on-board information and entertainment electronics.

Get Better Support on the Ground

Once installed with exacting detail, every Cabin Electronic System enjoys complete technical support, including a 24-hour hotline and access to our FAA-approved repair station where we can quickly return products back to operation and your aircraft back to the sky.

While you’re cruising at 40,000 feet, our standards are even higher

We employ only the latest technology to design and build full Digital and High Definition components. The result is the finest entertainment experience available for your aircraft cabin. Whatever your source equipment requirements may be, CD, DVD, or Blu-ray players, we offer high-resolution, full 1080p LCD displays for your viewing pleasure. Cabin Electronic Systems is truly on the cutting edge.

Turning Routine Flights into Extraordinary Experiences

Cabin Electronic Systems is the cabin management portion of the Interiors Group of UTC Aerospace Systems. We have been providing innovation to the industry since 1986. Now, we’re known as the leader in Cabin Management Systems (CMS) and In-Flight Entertainment (IFE). Cabin Electronic Systems’ customers can expect sharper video and clearer audio with less noise and interference.
